AUTHORIZATION LETTER

Wrocław, 1st April 2021

To Whom It May Concern,

Hereby, Zmorph S.A. is the manufacturer of products of the Zmorph trademark.

The Zmorph brand offers multifunctional high quality 3D printers along with professional support, with a knowledge base and with Zmorph academy and additional materials.

Zmorph informs that Zmorph VX is no longer produced as it has been replaced by our next generation multitool line model – Zmorph Fab.

As for the differences, we enhance you to accept the Zmorph Fab over Zmorph VX as the refreshed model brings you more safety with the HEPA/Carbon filters or has more quality and relability in the 3D printing.

Maxwell Distribution has exclusive authorized rights to sell, promote and support products of Zmorph S.A. in Republic of Kazakhstan.

Zmorph confirms they have a full knowledge of Zmorph Fab, same as they have with the Zmorph VX.

We highly recommend to purchase the Zmorph Fab with our long term Partner, Maxwell Distribution.

Bartosz Rusecki
